Date Completed: December 9, 2008  
Microfilm Accession Number: 1916

**MICROFILM ONLY**

## SCOPE & CONTENT NOTE

The microfilm publication of the Moses Helm Family Research Papers was a gift from Bob Law of Nashville, Tennessee. The collection consists of 6 rolls of 35 mm microfilm filmed by the Genealogical Society of Utah (GSU). GSU specifies the following restriction: "By contract with GSU and the owners of the records on the microfilm, it may not be sold or duplicated except under limited circumstances. For further information contact Family History Center Support, 50 East North Temple Street, Salt Lake City, Utah 84150." The 7-digit number on the side of each reel is the GSU identification number for this film.

The collection consists of the background, or working, files for the research and publication of the book *Moses Helm* by Bob Law and Clyde Smith in 1995. This published work is available in TSLA holdings in print form at call number CS71 .H479 1995 as well as an expanded 2<sup>nd</sup> edition on compact disc at CD 33.

The papers primarily relate to Moses Helm and the Helm family of the United States. The published volume is indexed and is divided into chapters by generation but does not include a narrative or overview on the history of the family. There does appear to be a Tennessee component to the family history.

The following direction for finding material in this collection is provided by the authors: "Locate the family you are interested in from the charts, such as B4 Dr. Moses Steele/Susan Bell, then from this sheet you can determine which film has this material. There is an index for the Helm Family tombstones at the end of film #1425416 and should be checked along with the (M) Miscellaneous file film #1425411 when working with any families."
