STATE CAPITOL REPAIR RECORDS
1866-1953
RECORD GROUP 14

Processed by:

V. G. C.
Archival Technical Services

Date Completed: April 27, 1971

MICROFILMED
SCOPE AND CONTENT

Record Group 14 presents all available archival material from the various periods of repair and renovation of the Tennessee State Capitol. The material is limited in volume but broad in scope.

Architectural blueprints and drawings span from 1938 to 1951. Correspondence is brief, but a letter of particular interest is one written by T.A. Atchison in 1877 to the Capitol Improvement Commission. Financial statements are broad in content and contain many valuable details, particularly the firm names, many of which are still in existence.

This record group also includes a significant report concerning repairs to the Capitol made to the legislative committee on buildings and grounds by H.P. McDonald, March 7, 1891. Nonetheless, nothing recommended in the 1891 report was done except the installation of some very badly needed rails around the terrace and the porticos. Again in 1902 a committee on repairs was appointed and the bulk of the necessary work was completed under the architectural firm of Brown and Brown.
